

CHALLENGE for global Peace.

For G 20 summit leaders on 7 and 8 July 2017, at a meeting in Hamburg, Germany and the United Nations.

"Call for a global Peace and the emergence of a single Peacekeeping Force of the Organization

United Nations (UN) with a unified command "

This is a challenge addressed to: G20 summit leaders on 7 and 8 July 2017 at a meeting in Hamburg, Germany and all leaders, politicians, diplomats, advisers, UN officials, UN Security Council, the EU and the planet Earth To find enough inner humility, compassion, respect and determination in them, to do everything in their power to bring peace and renew international co-operation. History reminds us that politicians and leaders have stood at the outset of most of the bloody conflicts in which strange people from different cultures stood up against each other in absurd struggles, sometimes a brother against a brother. Homosexual interests and well-thought-out reasons have been too many, too many so that we can continue to overlook and accept such unscrupulous behavior by some individuals whom people have given their power and will.

This challenge is a direct response to the worsening situation in the Middle East, North Korea, and especially in the European area where the immigration wave from third countries of the world (continued or new) has been fully erupted, the Cold War between the Russian Federation and the Western Bloc - NATO, USA. This crisis has fully eroded during the riots in Ukraine, but it has definitely deeper roots and overlaps. We are concerned not only with the new arms race, the increasing likelihood of conventional warfare, or even the fatal use of nuclear arsenal, but also with stronger frustration, paranoia, and hostility, all over the company.

Permanent peace can not be achieved by greater arms spending, other military bases, provocative exercises and promenades, the supply of military equipment and personnel to conflict areas, or by promoting propaganda or by pursuing sanctions and isolation that has a negative impact almost exclusively on the standard of living of ordinary people . This way mankind has taken its whole history, which only proves its nonsense, myopia and failure.

That is why we are now clearly expressing our sincere will to make a peaceful journey. And if our leaders refuse to lead us this way, then we are determined to do it ourselves. Without leaders, albeit uniformly, for a better tomorrow for all. We have all the prerequisites and possibilities that we can

really live in a free and safe world, without unnecessary distribution to those and others. All this can only be achieved by mutual respect, co-operation, and a unified intention to ensure peace and prosperity for all people.

That is why we are using the G20 Summit leaders on the 7th and 8th July 2017, at a meeting in Hamburg, at this meeting asking for support, Requests for a "Global Peace Challenge and the Establishment of a Single United Nations Peacekeeping Force (UN MOS) With the unified command "and the following individual points below:

We want to discuss and lead a debate on these points and on the G20 summit on 7 and 8 July 2017 in Hamburg - to ask for the adoption of a declaration to ensure global peace and the creation of a single UN peacekeeping force with a unified command. We also ask you to address the following issues:

1. The call for global peace and the emergence of unified United Nations Peacekeeping Forces (UNO) with a unified command. It is necessary to deal with the world's peace, let alone the summit G 20 on 7 and 8 July
2. The call for global peace and the emergence of unified United Nations Peacekeeping Forces (UNO) with a unified command. It is necessary to deal with the world peace, let the G 20 summit on 7 and 8 July be highlighted in the call for proposals and in the extended application !!
3. It is necessary to address the idea of entering the Russian Federation and Ukraine into the UN MOS in one time period, Concurrently !!! The unintentional entry of the UA into the NATO organization without the approval of the RF would be by burning gas into the fire !!! It could have catastrophic consequences, at least more competition in arms and unnecessary arms spending.
4. Reducing the cost of arms, building unified UN MOSs, the world community can save 40% of its finances annually and improve relations in the world. In 2015, the world spent \$ 1.8 trillion on arms, of which 40% = \$ 720 billion. USD. This money could be given to development programs and the ending of civilian wars in the world. It is necessary to set up a police force in the single UN MOS to oversee the financing of projects in third countries from the United Nations and the G-20, to maintain peace in the world with the adoption of effective legislation.
5. It is necessary to stop the transfer of NATO troops to RF borders !!!
6. It is necessary to stop the idea of building a basic NATO with the presence of American soldiers in Europe !!!
7. It is necessary to draw up a call for a peaceful call for the destruction of nuclear weapons and a ban on their expansion, to start disarmament of the world's armed forces and to create a group at the UN Security Council! At the same time, there is a need to put forward a proposal for a peaceful negotiation with North Korea on the suspension of tests and preparations for the use of nuclear weapons and weapons of mass destruction.
8. It is necessary to accept a declaration on the opening of the peace talks at the G20 summit on 7 and 8 July 2017 with the proposal to establish a group of future United Nations Peace Corps headquarters at the United Nations. The group's initiators must be NATO and G-20, including the Russian Federation, with the participation of defense ministers and selected generals !!!
9. It is necessary to reconsider the statement
[/http://en.sputniknews.com/svet/20160225/2453311/breedlove-usa-boj-rf-evropa.htm/](http://en.sputniknews.com/svet/20160225/2453311/breedlove-usa-boj-rf-evropa.htm/) NATO Force Commander in Europe, General Philip Breedlov, who at the meeting of the Committee For the

armed forces, the House of Representatives of the United States declared: "Russia has made a choice in favor of becoming the enemy of the United States and the NATO Organization and now threatens Europe."

10. It is necessary to adopt new UN legislative measures for the implementation of "Challenges for a global MIER and the emergence of unified UN peace-keeping OSOs with a unified command", to ensure peace on the planet Earth! Policies and stopping climate change on the planet Earth. Climate change must include climate degradation of the UN MOS, which at the summit on December 17, 2015, in Paris, nobody has solved !!

We, the undersigned citizens, each of us a unique personality forming a whole, express our own values that stand outside the ideological or economic framework, outside the political spectrum and blocks, official pacts or treaties, beyond the selfish interests. Our values stand on the solid, all-human foundations of freedom, solidarity and peace. Peace in us, peace in the world.

The request is made by: OZ - Mr Obcan: IČO: 42277647, Reg. VVS / 1 - 900/90 - 40051 and the Committee on Petitions:

Lt.. S.P. Ing. Viliam Baňák, Jedľová 863/25, 960 01 Zvolen, is the person charged with representing the petitions committee before public authorities, e-mail: obcsnemzv@gmail.com, mob .: 0904112799, Michaela Žilková, Rajecká 38, 821 07 Bratislava, Frantisek Tanko , Kopčianska 8, 851 01 Bratislava, Ľuba Rakovcová, Strážske, Ľubomír Schmída, Ružomberok
